About Us

Sears Clipping is a company that was started in 2002 by Matthew Sears and his family. Matt started his own company when he realized that agriculture was the only field of work he wanted to do for the rest of his life.

In 1996, his family moved from Boston, Mass, to Homer, New York. His father used to live on a farm when he grew up, so they decided to look for land that he could continue doing what he loved the most. They found 32 acres of land to use for themselves and that is when they started their own family of animals to raise. At first, they only had a couple chickens, a couple cows, and a couple horses. They raised and bred them until they were able to fill their land currently with over 30 healthy animals.

Matt gained most of his experience and training from living on a farm and taking his own animals to major shows, and other events across the nation. After his father passed away he felt the need to continue his father's legacy and continue working as a farmer. Over the years, he gained more knowledge and experience that helped make him widely known across the nation. Eventually it lead to him starting his own family owned business in the name of his father.
